## *Wadi Tiwi: Tiwi Corner*

### RATING/DIFFICULTY:

- » 52 m, 6a (5c obl.) Trad

### LOCATION/ACCESS:

- » You reach Wadi Tiwi from Muscat via coastal highway #17. Tiwi Corner is located on the left side, about 1500 m away from the huge bridge at the entrance of Wadi Tiwi. The striking pillar is easily visible from the street. Park your car in a lay-by and approach in 1 minute. 4WD is not necessary because the concrete road is still flat in this part of the valley. GPS-coordinates: N 22° 48' 66.70", E 59° 15' 13.62".

### EQUIPMENT/GEAR:

- » C4-Camalots in between 0.3–4.0, Stoppers, 60 m double rope.

### NOTE:

- » The route was climbed in trad style. The rock quality of Tiwi Corner is superb washed out limestone. On top of the pillar is a block with two slings for abseiling. You need a 50 m double rope (better 60 m) to rappel down in one go.
